

## **MEDIA RELEASE**

**Singapore, 6 July 2020**

### **Biocair<sup>®</sup> Becomes Member of The Infection Prevention Society**

BioCair, creator of BC-65™ Disinfection technology, has become a Corporate Member of the United Kingdom (UK) based Infection Prevention Society (IPS). The membership allows BioCair the opportunity to interact with IPS professionals on all aspects of the BioCair non-toxic disinfection technology with continued focus on infection prevention.

BioCair incorporated in the UK to continue the expansion of the company's non-toxic aerial disinfection systems.

The IPS, formerly the Infection Control Nurses Association (ICNA), was formed in the 1970's and aims to lead, shape and inform the infection prevention agenda locally, nationally and internationally to influence and promote the evidence base for infection prevention practice that is adopted universally.

#### About BioCair

BioCair's BC-65 dry-mist disinfection technology is used by leading healthcare facilities for aerial and full-room disinfection. Due to its non-toxic nature, efficacy and speed of use, BioCair's Rapid Aerial Disinfection Systems (RADS) are able to disinfect the air and surfaces, effectively eliminating airborne and surface microorganisms. The company was founded in 2010, holds multiple patents and is part of Singapore based JCS Biotech Pte Ltd.
